Carbon Reduction Projects

This is the first Carbon Reduction Plan for Ambulance Parts Ltd. In order to continue our progress to achieving Net Zero, we have set/adopted the following carbon reduction targets.

- Installation of a new, fuel efficient heating system
- Installation of new roof insulation, thus retaining heat
- Installation of new roller doors, replacing original wooden doors
- Installation of energy efficient LED lighting across premises
- Upgrading company fleet to efficient hybrid/electric vehicles
- Encouraging staff to walk/cycle to work where possible
- Offsetting carbon emissions by using Forest Carbon scheme or similar initiative

We project that carbon emissions will decrease over the next five years to 29.3 tCO₂e by 2029. This is a reduction of 20.6%.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

(Robort Stouanson) Di

Sustainability Statement

Ambulance Parts Limited recognise that the company has the potential to make an impact on the environment and we are committed to minimising those impacts. We are situated close to the Forest of Bowland and Lake District National Park, with magnificent views and wildlife habitats on our doorstep. We fully appreciate the beauty of the natural environment and our responsibility in helping to protect it. Our products are manufactured using the latest technology to minimise our carbon footprint and ensure consistently high quality finishes. We aim to act in a socially responsible manner at all times, ensuring that we consider our employees, customers, supply chain partners, the local community and the environment in all that we do. Our products are manufactured in line with ISO 9001 Quality Management, ISO 14001 Environmental Management and ISO 45001 Health and Safety Management.

In conjunction with the above statement, we abide by the following practices;

- The raw materials for the majority of our manufactured products are sourced locally from the North West of England. Reducing our carbon footprint.
- We are registered with the Environment agency for disposal of hazardous waste, POL's and tyres etc.
- We are inspected annually for the correct use/disposal of hazardous gases.
- We enlist the use of a company for disposal of cardboard, although we reuse as many boxes and flat cardboard as possible.
- We enlist the use a local recycling facility for our glass and plastic waste.
- We enlist the use of a local scrap metal company for all scrap/waste metals.
- We are committed to ensuring that as much of our unavoidable waste is disposed of by reputable companies.

Carbon Reduction Plan

Supplier name: Ambulance Parts Limited

Publication date: 29/01/2024

Commitment to achieving Net Zero

Ambulance Parts Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023-2024 (First Report)

Additional Details relating to the Baseline Emissions calculations.

This is the first CRP for Ambulance Parts Ltd. This report will be classed as a baseline report/final report for the first reporting year. We will endeavour to reduce our emissions and carbon footprint as we gain a better understanding of our total CO2e, working to acheiev Net Zero by 2050.

Baseline year emissions: 2023-2024

EMISSIONS	TOTAL (tCO₂e) Tonnes
Scope 1	20.4
