Door-Assist Kit

Vehicle Suitability: Fiat/Stellantis Variants
Model: 90 & 270 degree hinges

The system is designed to take the stress from the top of the door where gas struts are sometimes positioned which evidently causes cracking of the door over time.

The system also adds a degree of aesthetic design in allowing the whole mechanism, including the gas strut to be hidden behind the rear door panel and the light fittings.

The fittings are located in the same horizontal position as the door handles, thus ensuring all the opening door stress is at the same point as where the door would be pulled open.

Composition per kit, per door:

- Pillar Bracket - Stainless steel 4mm thickness
- Guide Arm – Stainless steel 10mm thickness
- Guide Blocks – High quality GSM Nylon
- Door Plate – 3mm mild steel, powder coated

Fitting time: approximately 1 hour per vehicle. Can be retrofitted to older vehicles.

Other Parts

We have been working with the North West Ambulance Service for many years, initially assisting with damaged vehicles and general repairs. As that relationship grew, it was increasingly apparent that there was a need for an array of spare parts to be made available in order to keep their fleet of Front Line and PTS vehicles on the road.

We now supply our parts directly to WAS/Wietmarscher Vehicles and Wilker Auto Conversions, and offer bespoke manufacturing solutions.

All of our parts are produced using the latest CAD, CNC Hydro, Laser and air cutting techniques, and production is controlled using systems designed to comply with the latest ISO 9001 quality standards.

The following is some examples of the parts we manufacture and supply to vehicle convertors and ambulance services:

- Access Ramps, Floor-Pans and associated spares including Drive Gear Units
- Defibrillator Security & Vision Assemblies
- Stainless Steel Tail Lift Handrails
- Anti-Corrosion Battery Cradles
- Bulkheads and Safety Frames
- Access Steps and Assemblies
- Wheelchair Carry Brackets
- Replacement Body Panels
- Interior Fittings
- Access Doors
- Door Stays
